

IT'S ALL ABOUT THE 5TH YEAR CELEBRATION

OCTOBER NEWSLETTER

A chat with our CEO

"Working in social care I could see there were so many gaps to fill in relation to clients needs. There is so much red tape within the care system that clients needs didn't seem to be the priority. When it comes to care, people require personalised plans one box does not fit all. They require flexibility to suit and meet their needs. What would work for one client wouldn't necessarily work for the other client. So I wanted to be able to offer flexibility to bridge the gap without it being a tick box exercise.

We as an organisation are client led, we fit into the client profile rather than the client fitting into ours; so that we can empower them to sustain their independence for example helping and supporting individuals to continue to live at home and live their best lives as we support them and meet their needs.

This also overlaps into the team - I wanted our team to be able to work within a flexible environment, to feel free with ideas, to encourage personal growth and develop as a person."
